CAREER OBJECTIVE

A dedicated Information Technology (Hons.) student from Universiti Teknologi PETRONAS, majoring in Data Analytics with a CGPA of 3.67. Enthusiastic about data analytics, database management, full-stack development and SAP functional support, supported by hands-on experience in system development, machine learning and enterprise business processes. Committed to applying analytical thinking, technical skills and problem-solving abilities to contribute effectively within a professional IT environment. Seeking a challenging graduate opportunity in Data Analytics, SAP, Business Systems, IT or related technology roles.

EDUCATION

Universiti Teknologi PETRONAS (UTP)

Bachelor of Information Technology (Hons.) | Major in Data Analytics |

Minor in Financial Management | CGPA: 3.67 | MUET BAND: 3.5

Expected Graduation: December 2026

Seri Iskandar, Perak

September 2023 - December 2026

Pulau Pinang Matriculation College

Matriculation in Physical Science (Physics)

CGPA: 3.48

Kepala Batas, Pulau Pinang

May 2021 - May 2023

PROFESSIONAL EXPERIENCE

Celestica GBS Penang (M) Sdn. Bhd.

IT Intern – SAP Functional Team, SAP COE

September 2025 - April 2026

- Managed and supported daily SAP functional requests through ServiceNow, mainly involving SAP MM/MM and SD processes, helping business users resolve operational issues and maintain smooth system usage.
- Performed functional support activities including service requests, cost roll processes, system enhancements and requirement clarification with business users, ensuring requested changes were accurately understood and addressed.
- Executed functional testing and validation for SAP-related changes before completion, helping confirm that enhancements met business requirements and reduced the risk of implementation issues.

Sekolah Kebangsaan Mohd Shah

Preschool Teacher Assistant

June 2023 - August 2023

- Supported preschool teachers in conducting daily classroom and early-learning activities for children aged 4–6, helping maintain an organised and engaging learning environment.
- Guided students through literacy activities including letter recognition and basic spelling, supporting the development of their foundational reading and language skills.
- Adapted explanations and classroom support according to different student learning needs while assisting with multiple activities, strengthening communication, adaptability, multitasking and problem-solving skills.

ACADEMIC PROJECTS

Lecturer Learning Analytics & Student Risk Prediction System - FYP

June 2026

- Developing a full-stack learning analytics platform for lecturers to analyse assessment performance, identify weak chapters and monitor student academic risk.
- Built an Excel validation and analytics pipeline using Python and Pandas, integrated with a Django REST API and React frontend for structured assessment processing and dashboard delivery.
- Implemented and evaluated Logistic Regression, Random Forest and Decision Tree models using scikit-learn for three-level student risk classification.

Project Tracking & Workload Monitoring System - Internship Project

September 2025

- Developed a full-stack project tracking and workload monitoring system to improve the SAP COE team's Excel-based task management process, centralising project, task and workload information in a single platform.
- Implemented key functions including admin and user dashboards, project and task workflows, workload monitoring, priority and status tracking, Kanban-style views and Gantt chart visualisation, improving visibility of ongoing work and project progress.
- Integrated the frontend, Express.js backend APIs and PostgreSQL database, then presented and demonstrated the system to users and incorporated feedback to improve usability and align the solution with actual team requirements.

UTP Food Online Ordering System

January 2024

- Developed a Java-based campus food ordering system to allow students to browse available cafés, view menus and prices, and place food orders through a structured interface.
- Implemented core ordering functions including café availability, menu browsing, order placement and order tracking, providing students with a more organised way to manage campus food purchases.
- Applied Object-Oriented Programming concepts including classes, objects, encapsulation and methods to structure system functionalities and improve code organisation and maintainability.

Flight Booking System

January 2024

- Developed a responsive web-based flight booking system to allow users to search for flights, enter booking details and manage customer reservations through an interactive interface.
- Implemented key functions including dynamic booking forms, flight selection and booking record management, creating a more structured and user-friendly booking process.
- Integrated HTML, CSS, JavaScript and MySQL to support frontend interaction, data storage, retrieval and booking history management while improving overall data accessibility.

LEADERSHIP & ACTIVITIES

Community Engagement Project (STEMgenuity : Cultivating Local Innovation)

January 2025 – May 2025

Assistant Project Director

- Coordinated the planning and execution of STEM learning activities involving basic electronics and Arduino-based workshops for 60 Orang Asli students, supporting an engaging hands-on learning experience.
- Managed programme coordination, communication and logistics with the project team and participants, contributing to the smooth delivery of the community engagement programme.

Admission Records Marketing Youth (ARMy)

May 2025 – August 2025

Assistant Department Head

- Coordinated departmental activities and supported team members in university admission and outreach initiatives, helping ensure assigned tasks and programme requirements were completed effectively.
- Collaborated with committee members and stakeholders to manage communication, planning and operational matters, strengthening leadership, teamwork and organisational skills.

Campus Venture Day (CAVE)

May 2025

Assistant Project Director

- Coordinated participating clubs and programme logistics, providing guidance on booth preparation, promotional materials and activities to support smooth event execution.
- Facilitated communication between student organisations and relevant stakeholders while resolving operational issues, helping maintain effective collaboration throughout the programme.

Talent Development Unit Program

March 2024

Secretary

- Managed programme documentation including meeting minutes, schedules and official correspondence, ensuring information was organised and accurately recorded.
- Coordinated communication with speakers, participants and university departments, supporting smooth programme preparation while strengthening professional communication and time-management skills.

AWARDS & ACHIEVEMENTS

- Awarded Dean's List from Semester 1 to Semester 8 in recognition of consistent academic excellence throughout the programme.
- Awarded Bronze Medal in National-Level Kabaddi Competition.
- Awarded Bronze Award in MASCAR (Matriculation STEM Carnival).
